

Colloquium on December 9th, 2020 – second edition

« Health data and collective intelligence »

Detailed programme

In an era where data is the new gold, there is a growing interest in exploiting the richness of health databases for the purpose of research and innovation. The French and European speakers at our conference will present concrete cases and benefits of the use of these data in order to improve the healthcare system and patient support, both at the national and European level.

2.00 pm CET - Keynote Speech

- **M. Éric Bothorel**, Member of Parliament

2.15 pm CET - National policies and projects to promote digital health and Artificial Intelligence

- **Laura Letourneau**, Ministerial Delegate for digital health
- **Alain Issarni**, Chief Information Officer of the Health Insurance Fund
- **Olivier Clatz**, Director of the Grand Défi programme « Improvement of medical diagnostics by AI »
- **Stéphanie Combes**, Director of the Health Data Hub

3.00 pm CET - The benefits of using health data - five stories

- **Dr. Salam Abbara**, PhD student in epidemiology (Thesis on the impact of antibiotic resistance) Paris Saclay University, Inserm
